

## WHO WE ARE

For over 20 years, iParametrics has been a trusted consultant and partner to federal, state, and municipal clients throughout the United States. We offer expert guidance to governments and agencies for crisis and disaster response, focusing on strategic planning, program development, and capacity building to optimize relief efforts and promote sustainable development. We deliver a diverse range of emergency management consulting and supporting services, including the private sector. Our team is experienced at building cadres and standing up technical teams for programs large and small. We have successfully mobilized and deployed staff to projects across all 50 states, five US territories, and 39 countries.

## HUMANITARIAN SERVICES

## OUR TEAM'S EXPERIENCE

Our staff have been managing Disaster Case Management programs for the last 10 years, supporting five major disaster recovery missions across four states.

### Program highlights include:

- Training of **150** Disaster Case Managers
- **8,000** survivor households served
- **6,500** positive case closures for survivor households
- CDBG-DR action planning collaboration in **three** states
- CDBG-DR intake and eligibility in Lexington, SC
- Cadre development of **250** child welfare professionals to support case management for unaccompanied minor children immigrating to the United States

## BENEFITS OF THE IPARAMETRICS TEAM:

- We give our state and federal clients a **streamlined and targeted approach to identifying underserved survivor communities** with the greatest needs by implementing our technology and advanced analytics to facilitate program delivery.
- We use our **custom learning curriculum to prepare our staff to deliver the highest quality, client centered care** enabling them to swiftly recover from the impacts of the disaster event and return to a state of normal.
- We encourage and facilitate **cooperation, communication, collaboration, and coordination with state and local partners** to ensure the most effective sequence of delivery is utilized in addressing the survivor's unmet needs.
