

WHO WE ARE

iParametrics is an SBA-qualified small business with over 20 years of experience providing a diverse range of advisory services in emergency management. We provide multi-faceted solutions in a broad range of recovery support services, including providing technical staff who can support federal, state, and municipal government programs to be more efficient, productive, and compliant.

We support the full range of the emergency management lifecycle, from planning to response. **We have successfully supported public and private sector clients in these services in all 50 states, including New Jersey, five US territories, and 39 countries.**

OUR EXPERTISE

We have provided expertise, consulting, and support on thousands of government projects for clients throughout the United States and abroad. Firm highlights include:

- 20+ years leading and supporting federal, state, and local programs
- Consistently supporting the nation's disaster planning, response, and recovery since 2004
- Continuously supporting DHS National Critical Infrastructure Protection Programs since 2010
- Conducting 7,000+ physical security and all-hazards assessments since 2003
- Supporting 70+ presidentially declared disasters throughout the United States and its territories

"iParametrics helped us to receive unprecedented grant funding from multiple disasters as well as achieving the third highest grant in the County for needed first responder gear. They are always available to us and extraordinarily responsive and proactive to our needs."

- Borough of Hamburg Emergency Manager

We give our clients a competitive advantage by delivering on the following:

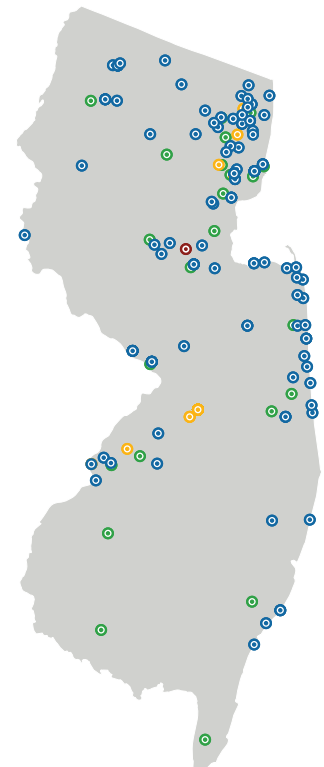

- **Designing, developing, and implementing technology and advanced analytics** to empower and facilitate program delivery
- **Creating and deploying technology systems** to increase productivity, enhanced visibility, and to ensure quality for the programs we manage
- **Crafting custom learning curriculum** to support planning and operations
- **Designing custom exercises** to evaluate program effectiveness for guiding client operations
- **Providing certified professionals** in engineering, construction, cost, security, emergency management, and project management
